IRENE PORRO

Senior Product Designer | Design Systems · Design Engineering · AI-Assisted Prototyping

Based in Spain · EU | +34 672 10 38 96 | ireneporro6@gmail.com | ireneporro.com

PROFILE

Senior Product Designer with 5+ years of experience shipping complex B2B SaaS products and simplifying role-based workflows. Led redesigns that helped bring two long-running enterprise products into production. Build scalable design systems and functional, code-based prototypes using VS Code, AI-assisted development, GitHub/Bitbucket and Vercel; share working code with engineers for adaptation into production. Own product journeys from discovery and scope definition through implementation and Design QA.

CORE SKILLS & TOOLS

Product: Product Discovery · User Journeys · Complex Workflows · Information Architecture · Interaction Design · High-Fidelity UI · Responsive Design · Functional Prototyping · Design QA · Product–Engineering Collaboration · MVP Scoping

Systems: Design System Architecture · Design Tokens · Component Libraries · Variants & States · Documentation · Cross-Product Consistency · Design-to-Code Collaboration

Design + code: VS Code · GitHub · Bitbucket · Vercel · Claude · Codex · MCP Integrations · AI-Assisted Development · HTML/CSS · Figma (advanced, motion & prototyping) · Framer · Webflow

Domains: Enterprise B2B SaaS · HR Tech · MSP/EOR · Payroll · Time Tracking · CRM · Internal Tools · Dashboards · Web & Mobile

EXPERIENCE

Senior Product Designer | Kraferd INC / emmyHealth

Aug 2024 – Present · Senior since Feb 2025 · Los Angeles, USA · Remote

- Led end-to-end redesigns of 3 enterprise HR SaaS products across a 4-product portfolio; helped launch 2 products that had been in development for up to 5 years, now used by approximately 200–300 people across 10+ client companies.
- Own discovery through release across complex role-based workflows, permissions, eSignature and time tracking; user-usage measurements indicated an estimated ~80% improvement in workflow efficiency following redesign.
- Built shared design-system foundations, grids, dashboard patterns and component libraries across products: ~38 core components (~42 with shared patterns), 177 CSS tokens and token adoption across 500+ files.
- Build and deploy functional UI prototypes in VS Code with Claude, Codex and MCP workflows, using GitHub/Bitbucket repositories and Vercel; hand working code to engineers for adaptation and integration into production.
- Partner with ~7 engineers and Product on requirements, technical trade-offs, MVP scope and implementation; review production UI, interaction states and edge cases against design intent to reduce handoff ambiguity and rework.
- Validate workflows with stakeholders, document implementation decisions and maintain reusable UI guidance; shared foundations support ~8 developers and feature delivery within two-week sprints.
- Design and build role-based training experiences for each product, including animated user journeys, to help internal teams and end users understand workflows, onboard and complete tasks.

Independent Product Designer | Selected Freelance Projects

Jun 2023 – Present · Project-based · Remote

- Delivered 6+ engagements spanning SaaS/product redesigns, responsive web experiences, agency work and end-to-end design of a consumer mobile app.
- Led projects from ambiguous requirements through discovery, UX flows, interaction design, functional prototypes and delivery; collaborated with international clients and distributed teams.

UX/UI Design Mentor | Coderhouse

Nov 2023 – Jun 2026 · Argentina · Remote

- Mentored 300+ UX/UI students across approximately 5 cohorts, providing structured feedback on research, user journeys, interface craft, design systems and portfolio case studies.

UX & Product Designer | HeyAndes

Mar 2024 – Jun 2024 · Chile · Remote

- Redesigned onboarding and SaaS experiences, translating friction points and business goals into clearer journeys; collaborated with development, marketing and leadership.

Project Manager | Sur Studio

Sep 2023 – Feb 2024 · Boston, USA · Remote

- Coordinated delivery across clients, designers and developers, managing priorities, timelines and cross-functional communication across simultaneous digital projects.

Product & UX Designer | Escorpio

2020 – 2021 · Argentina

- Designed and prototyped web and mobile interfaces, interaction patterns, e-commerce improvements and visual systems.

EDUCATION

Marketing · Universidad Tecnológica Nacional (UTN), Argentina · In progress (expected 2028)

Interior Design · Universidad Nacional de Río Negro · 2 years completed | English Translation · Universidad Nacional del Comahue · 2 years completed

CERTIFICATIONS & LANGUAGES

UX/UI Design · UTN | UX Research, UX Writing, Advanced UX/UI · Coderhouse | Project Management Fundamentals · Google/Coursera | Agile Methodologies · Universidad Blas Pascal

English (C1) · Spanish (Native)
