

IRENE PORRO

Senior Product Designer | Enterprise B2B SaaS · Complex Platforms · Design Systems

Based in Spain · EU · +34 672 10 38 96 · ireneporro6@gmail.com · ireneporro.com

PROFILE

Senior Product Designer with 5+ years of experience designing and scaling complex B2B SaaS and platform products for international teams. Led end-to-end product design across enterprise HR software, helping ship products that had been in development for up to five years without launching. Strong ownership across product discovery, complex role-based workflows, stakeholder research, interaction design, functional prototyping, multi-product design systems, Design QA and pragmatic MVP definition in close partnership with Product and Engineering.

CORE SKILLS

Product Design · UX/UI Design · Product Discovery · Stakeholder Research · User Flows · Workflow Mapping · Wireframing · Functional Prototyping · Interaction Design · Information Architecture · Design Systems · Design Tokens · Component Libraries · Responsive Design · Design QA · MVP Definition · Developer Handoff · Roadmap Prioritization · Cross-functional Collaboration

Domains: Enterprise B2B SaaS · HR Tech · MSP/EOR · Payroll · Time Tracking · CRM · Internal Tools · Data-heavy Interfaces · Role-based Systems · Web & Mobile

Tools: Figma (advanced, prototyping & motion) · FigJam · Notion · Jira · Claude · Codex · MCP · GitHub · Bitbucket · Vercel · Framer · Webflow · HTML/CSS · Adobe Creative Suite

WORK EXPERIENCE

Senior Product Designer · Kraferd INC / emmyHealth

Aug 2024 – Present · Senior since Feb 2025 · Los Angeles, CA, USA · Remote

- Lead the end-to-end redesign of 3 enterprise B2B HR SaaS products within a 4-product portfolio. Two of them had been in development for up to five years without launching; both shipped to production and are used by around 200–300 people.
- Served as the sole Product Designer for most of the product lifecycle, owning discovery, stakeholder-led research, workflow mapping, information architecture, interaction design, high-fidelity UI, prototyping, design systems, developer handoff and implementation review.
- Design and scale complex enterprise workflows including Roles & Permissions, Settings, eSignature, Time Tracking and Assignment Tracking for admins, HR teams, recruiters, payroll specialists, managers, employees and enterprise clients, accounting for role-based access, business rules, operational complexity and edge cases.
- Built and documented a shared multi-product design system from the ground up (common foundations, rules, tokens, grids, dashboard and metrics patterns) while keeping product-specific component libraries and branding. Used daily by around 8 developers; features now ship within a single two-week sprint.
- Scaled the main product's production library to approximately 38 primary components (about 42 including shared production patterns), excluding variants, states and internal subcomponents; the other products maintain their own component sets on the same foundations.
- Run stakeholder validation meetings before each feature and deliver documented flows, handoff and Design QA for every release, reducing UI inconsistency, repeated design work and implementation ambiguity across the portfolio.
- Build rapid functional prototypes with Claude and Codex using MCP/local workflows, GitHub or Bitbucket and Vercel deployments to validate flows, logic and product behavior before engineering implementation.
- Partner with Product and ~7 engineers on roadmap prioritization, requirements, scope and MVP definition, proposing alternative UX approaches while balancing user experience, technical constraints, deadlines and development capacity.
- Designed and built a role-based training site with animated workflow journeys for the 200–300 users onboarding to the platforms, and maintain product documentation that PMs use to onboard new team members.

Independent Product Designer · Selected Freelance Projects

Jun 2023 – Present · Project-based · Remote

- Delivered 6+ engagements across product design, UX/UI, project leadership and analysis, including SaaS and product redesigns, landing pages, agency work and end-to-end design of a consumer mobile app.
- Led selected engagements from ambiguous requirements through discovery, flows, information architecture, responsive UI, functional prototypes and delivery, translating business goals into practical MVP scope.

- Worked directly with international clients and distributed teams, presenting design rationale, managing feedback and adapting solutions to technical, timeline, usability and conversion constraints.

UX/UI Design Mentor · Coderhouse

Nov 2023 – Jun 2026 · Argentina · Remote

- Mentored UX/UI students across multiple cohorts, providing structured critique on research, user flows, information architecture, design systems, usability and portfolio-ready product work.
- Helped students connect UX rationale to interface decisions and improve the clarity, consistency and professional presentation of end-to-end case studies.

UX & Product Designer · HeyAndes

Mar 2024 – Jun 2024 · Chile · Remote

- Analyzed and redesigned onboarding and SaaS product experiences, identifying friction points and translating UX findings into clearer flows and operational improvements.
- Collaborated with development, marketing and leadership to align user experience decisions with business objectives, implementation constraints and conversion needs.

Project Manager · Sur Studio

Sep 2023 – Feb 2024 · Boston, MA, USA · Remote

- Coordinated end-to-end delivery across clients, designers and developers, managing timelines, priorities, communication and multiple simultaneous digital projects.
- Translated client needs into actionable work, maintained cross-functional alignment and supported sprint-based execution across a distributed creative and development team.

Product & UX Designer · Escorpio

2020 – 2021 · Argentina

- Designed and prototyped web and mobile experiences, interaction patterns, e-commerce improvements and visual systems, building foundational product and UX/UI design experience.
- Worked across early-stage requirements, interface design and prototyping, developing a practical understanding of how product decisions translate into usable digital experiences.

EDUCATION

Marketing · Universidad Tecnológica Nacional (UTN), Argentina | Bachelor's degree studies · In Progress · Expected graduation: 2028

Interior Design · Universidad Nacional de Río Negro, Argentina | University studies · 2 years completed

English Translation · Universidad Nacional del Comahue, Argentina | University studies · 2 years completed

CERTIFICATIONS & PROFESSIONAL TRAINING

UX/UI Design Program · Universidad Tecnológica Nacional (UTN) · UX Research · UX Writing · Advanced UX/UI · Coderhouse

Project Management Fundamentals · Google (Coursera) · Agile Methodologies · Universidad Blas Pascal

Languages: English (C1) · Spanish (Native)
